Spain) and Dr. Juan F. Gastón Añaños (Hospital de Barbastro, Spain). These findings are summarised in the table below.

Many of these substances were observed as being bonded to the graphene oxide nanoparticles. GO nanoparticles are necrotic, able to pass into or through physiological barriers including (but not limited to) the blood-air barrier, the blood-testis barrier, the blood-brain barrier, and the blood-placenta barrier. Over a period of several months after intramuscular injection, as much as 75% of the GO nanoparticle “delivery platform”, and most of the substances listed below, are transported extensively throughout the bodies of mammals, into the blood, brain and other organs. Some of the many toxic effects of graphene oxide are myocarditis and blood clotting.

“Texas is now engaged in a major conflict with Covid-19. However, it will not be the only sickness the state will have to cope with within 2021. The state also faces a possible outbreak of Chagas Disease.”

Source : <https://www.natureworldnews.com/articles/47211/20210825/chagas-disease-texas-faces-new-deadly-outbreak-amidst-covid-pandemic.htm>

There has been some recent media reporting around snake venom as possible source of compounds for treating “COVID”. There’s similar research looking at scorpion venom as a treatment for Chagas. This makes sense if we’re dealing with a living parasite, against which these complex toxins are effective.

Further media reports appeared in recent months with regard to warnings from the CDC in 2018 of possible outbreaks of Acute Flaccid Myelitis in young children. Here’s an excerpt from the CDC’s “Transcript for CDC Telebriefing: Update on Acute Flaccid Myelitis (AFM) in the U.S.” dated 17 October, 2018:

Right now, we know that poliovirus is not the cause of these AFM cases. CDC has tested every stool specimen from the AFM patients, none of the specimens have tested positive for the poliovirus. AFM can be caused by other viruses, such as enterovirus and west nile virus, environmental toxins and a condition where the body’s immune system attacks and destroys body tissue that it mistakes for foreign material. While we know that these can cause AFM, we

The CDC yesterday published a denial (through FactCheck.org) that they had issued any such warnings, and have removed the inconvenient content from their website. If it weren't for the Internet Archive half of our recent recorded history would have gone down the memory hole already.

According to the CDC's published data, AFM outbreaks have been growing in severity, following a regular two-year cycle over the the past seven years.

There exists at least one patent for these iatrogenic chimeras. Submitted in September 2020:

Nano coronavirus recombinant vaccine taking graphene oxide as carrier

Abstract

The invention belongs to the field of nano materials and biomedicine, and relates to a vaccine, in particular to development of 2019-nCoV coronavirus nuclear recombinant nano vaccine. The invention also comprises a preparation method of the vaccine and application of the vaccine in animal experiments. The new corona vaccine contains graphene oxide, carnosine, CpG and new corona virus RBD; binding carnosine,

Chinese counterparts for at least 30 years.

Pfizer has invested more than US\$500 million in China since the 1980s, GlaxoSmithKline (GSK) has invested over US\$400 million, while AstraZeneca has invested more than US\$140 million.

AstraZeneca has opened an East Asia clinical trial center in Shanghai, Roche established its first Asian R&D center in Shanghai, Eli Lilly has also opened up a research and development (R&D) facility in Shanghai, and Novo Nordisk has an R&D facility in the Beijing Zhongguancun (ZGC) Life Science Park. GSK and Pfizer have also set up R&D centers in China.
